-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a particular structure of a power supply device having a connection of data communication, classified in class 713, subclass 300.
 - II. Claims 5-15, drawn to a particular structure of a power adapter having an enclosure mating with a brick enclosure, classified in class 439, subclass 122.
 - III. Claim 16-28, drawn to a particular structure of power supply having an ac-dc converter, classified in class 363, subclass 146.

The inventions are distinct, each from the other because of the following reasons:

2. Invention I and inventions II and III, respectively, are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the power supply device as claimed in Group I, claims 1-4, is not necessary to contain particular elements as claimed in the adapter of Group II and/or the power supply of Group III.

The subcombination has separate utility such as the power adapter as claimed in Group II, claims 5-15, and/or the power supply as claimed in Group III, claims 16-28 can be used without the present of data communication connection as claimed in power supply device of Group I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicants are suggested to elect one group of inventions at a time.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew V. Nguyen whose telephone number is (571) 272-2081.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2800.
